SUMMARY

Bachelor's degree in IT-Operations and Information Security from the Norwegian University of Science and Technology, in addition to general software development experience and education. I have a wide understanding of IT technologies and usage, and a strong affinity for learning a breadth of topics deeply. Some interests include self-hosting, networking, volunteering to help people and causes, and much more.

EXPERIENCE

Spotlight Marathon, Tech Organization

2026-current

Co-organizing and running live stream tech and setup for an online, grassroots Queer Arts + Gaming Showcase for Trans Rights.

Making View AS, Hamar, Norway

Jan 2023 - Sep 2023

9 month internship at an award winning Norwegian company, with the current goal of developing and providing VR-solutions health care training.

I assisted in multiple tasks, including but not limited to:

- assisted in internal safety assessments developing related procedures
- contributing in backend development of a user portal, helped designing ops for this
- discussed and observed how they performed their basic internal office network access

Community Tech

2021-current

Running and assisting live streamed events, compiling and producing resources, documentation, and being a central figure behind the scenes for smooth operations of online community events for years.

PROJECTS

IRMA: Incident Response & Malware Analysis

[Github](#)

An open-source malware analysis platform, using Ansible to automate the running of sandboxed analysis software in probes, and collecting the results and presenting in an easily readable format.

LiveSplit.HollowKnight

[Github](#)

Contributions to a LiveSplit autosplitter and load remover in C#. Informally responsible for PR reviews and giving the go-ahead to the maintainer for the past years.

DebugMod

[Github](#)

Contributions to savestates and other improvements for a Unity game using a MonoMod modding API, including improved instructions on setup of the build environment for future contributions.

EDUCATION

2016 - 2019 Bachelor's Degree (IT-Operations and Information Security) at **the Norwegian University of Science and Technology**

- Information security, risk analysis and management, and operations of IT systems and solutions.
- Software development, software design, Agile development, system design, and various development and operation methodologies.

LANGUAGES

- English: Fluent both written and oral
- Norwegian: Native language
- Danish: Good understanding

SKILLS

Git	Version control through Git CLI.
Linux	Setup multiple systems, including Arch with manual tweaking to maximize low-spec hardware; bash scripting and use of various Linux systems, very comfortable with either CLI or GUI.
Service Architecture Ops	Automation, load-normalising, monitoring, and maintaining the operation of a social media service, including accessibility, databases, hosting, etc. in a simulated setting to ensure availability through.
Containerization	Have used Docker, Podman, Ansible, and have cursory knowledge of Kubernetes / K8s.
Scripting	Bash with parameters, and checking of both arguments and other inputs. Both Python and Bash for automating repeatable tasks.
C#/.net	Various projects.
Computer Networks	Networking technicalities and protocols, Cisco devices, and both simulated and real setup of network, VLANs, etc.
Network Security	Routing and switching, network security like AAA, IPS/IDS, VPN, ISMS. WAN concepts and technologies for scalable solutions. Wireless Networks.
AI for Work and Life	Usage of AI, including benefits, considerations, limitations, potential for future tools, and current tools for various tasks.
Driving License	Norwegian class B, personal vehicle of up to 3,500 kg.
