SUMMARY

Bachelor in IT-Operations and Information Security from the Norwegian University of Science and Technology, in addition to general software development experience and education. I have a wide understanding relevant IT technology, and a strong affinity for learning both more and deeper.

I am a Norwegian citizen currently residing in Norway, and I have a strong interest in migrating for work where I wish to apply myself and use my skills and interests to build a career. Some experiences acquired formally through education, some through informal interests like self-hosting servers, networking, volunteer work, and more.

WORK EXPERIENCE

Making View AS, Hamar, Norway

Jan 2023 - Sep 2023

9 month internship at an award winning Norwegian company, with the current goal of developing and providing VR-solutions health care training.

I assisted in multiple tasks, including but not limited to:

- assisted in internal safety assessments developing related procedures
- contributing in backend development of a user portal, helped work on the development of the hosting of this service
- discussed and observed how they performed their basic internal office network access

EDUCATION

2016 - 2019 Bachelor's Degree (IT-Operations and Information Security) at **the Norwegian University of Science and Technology**

SKILLS

Computer Networks	Networking technicalities and protocols, Cisco devices, and both simulated and real setup of network.
Network Security	Routing and switching, network security like AAA, IPS/IDS, VPN, ISMS. WAN concepts and technologies for scalable solutions. Wireless Networks.
Git	Version control through private and formal use (currently in the process of migrating GitHub accounts to separate publicly and not-publicly available information).
Linux	Used multiple distros, low-end laptop for instance required use of Arch Linux; bash scripting and use of various Linux applications.
Service Architecture Operations	Automation, load-normalising, monitoring, and maintaining the operation of a social media service, including accessibility, databases, hosting, etc, in a simulated setting to ensure availability through a semester-long project.
C#/.net	Various smaller projects.
